

Keil Eduardo Chinchilla Pineda

[linkedin.com/in/keilhumano](https://www.linkedin.com/in/keilhumano) | keilhumano@gmail.com

UX & UI Designer with over five years of experience designing intuitive, visually appealing, and scalable web and mobile applications. Specialized in efficiently combining user-centered interfaces. Proven ability to lead projects from start to finish, collaborate with multidisciplinary teams, and deliver high-quality digital solutions aligned with business objectives. Easily adapt to complex contexts and institutional environments, applying best practices in design, documentation, testing, and integration processes.

RELEVANT EXPERIENCE

Acklen Avenue | UX & UI Designer

June 2021 – Present

- Work in agile teams using the SCRUM methodology to synchronize design and development.
- Design and maintain design systems in Figma, ensuring visual consistency and scalability across products.
- Participated in 11 projects: eight from initial concept to launch, and three expanding or scaling existing platforms.
- Serve as Lead Designer in various projects: coordinate research, define style guides, and align solutions with business goals.
- Mentor junior designers: led design reviews and shared best practices, raising the overall quality of the team.
- Deliver interactive prototypes and detailed documentation, reducing development rework and accelerating time-to-market.
- Collaborate with product owners and stakeholders to prioritize features based on usage data and user feedback.

Freelance | UX & UI Designer

August 2020 – Present

- Design responsive websites and mobile applications for clients in technology, e-commerce, and education, aligning business strategy with UX/UI principles.
- Lead the end-to-end process: user research, information architecture, wireframes, prototypes in Figma, usability testing, and development handoff.
- Collaborate directly with clients to gather requirements, define functionalities, and deliver personalized, scalable digital products.
- Optimize conversion and onboarding flows, achieving up to 20% increases in key metrics.

EDUCATION

Bachelor's Degree in Digital Animation and Interactive Design
Tegucigalpa, Honduras

Universidad Tecnológica Centroamericana (UNITEC)

SKILLS

- **User Experience Design (UX):** Create intuitive digital experiences aligned with real user needs.
- **User Interface Design (UI):** Design consistent and visually appealing interfaces for web and mobile.
- **Product Design:** Manage the complete digital product development cycle from concept to launch.
- **Interaction Design:** Model flows and micro-interactions that enhance usability and efficiency.
- **User-Centered Design & Design Thinking:** Apply problem-solving methodologies focused on the user.
- **Information Architecture:** Organize content and navigation into logical, easy-to-explore structures.
- **Wireframing & Prototyping (low and high fidelity):** Produce mockups and prototypes to quickly validate ideas with stakeholders.
- **User Research & Usability Testing:** Lead studies and tests that back design decisions with data.
- **Workshop Facilitation & Mentorship:** Lead workshops, guide teams, and teach UX/UI principles.
- **Cross-Disciplinary Collaboration & Stakeholder Communication:** Coordinate with developers and PMs to ensure goal alignment.
- **Tools:** Figma, Sketch, InVision, Adobe XD, Adobe Creative Cloud, HTML, CSS, Tailwind.
